SUMMARY

Results driven Cloud and DevOps Engineer with 3+ years of experience automating AWS cloud infrastructure and CI/CD pipelines using Terraform, Kubernetes, Jenkins and GitHub Actions. Proven success in reducing deployment times by 25% and cutting cloud costs by 20% through infrastructure optimization. Passionate about driving reliability, scalability, and automation in high availability cloud environments.

TECHNICAL SKILLS

Operating Systems	: Linux , Windows Server
Cloud Platforms	: AWS (EC2, EKS, VPC, IAM, S3, RDS, Route53, CFT, ELB, CloudWatch)
IaC & Configuration Management	: Terraform, Ansible, Helm, AWS CloudFormation
CI/CD Tools	: Jenkins, GitHub Actions, Argo CD, Gitlab CI/CD
Containers & Orchestration	: Docker, Kubernetes, Helm Charts, Amazon ECR, EKS
Build & Code Quality Tools	: Maven, SonarQube
Scripting & Automation	: Shell, Python, Groovy
Monitoring & Observability	: Prometheus, Grafana, AWS CloudWatch
Networking & Security	: VPC, Subnets, Load Balancing, DNS (Route53), HTTP/TCP/UDP, SSL/TLS
Collaboration & Agile Tools	: Jira, Confluence, Git, GitHub, Agile

WORK EXPERIENCE

CGI, Hyderabad – Software Engineer

April 2024 – PRESENT

- Engineered and managed Terraform modules for reusable infrastructure provisioning, reducing code duplication by 30% and improving team scalability.
- Architected and optimized CI/CD pipelines using Jenkins, Maven, and GitHub Actions, reducing build and deployment times by 20% and improving release success rate by 30%.
- Designed Helm charts to orchestrate microservices deployments, enabling rapid rollouts and zero downtime upgrades.
- Containerized 20+ microservices with Docker and deployed to AWS ECR and EKS, ensuring consistent, portable, and scalable application deployments.
- Spearheaded Kubernetes adoption on AWS EKS, improving deployment scalability and achieving 20% cost savings through optimized cluster resource allocation.
- Facilitated DevOps best practices by leading internal knowledge sessions on Git branching strategies and CI/CD optimization, reducing merge conflicts by 25% and improving team velocity.
- Enhanced system Observability by creating centralized Prometheus and Grafana dashboards, improving real-time alerting and reducing MTTR by 20%.
- Established Terraform remote state management with S3 and DynamoDB, enabling team-wide collaboration and drift prevention for multi-environment infrastructure.
- Secured cloud infrastructure by implementing AWS IAM least-privilege policies and automated compliance checks, strengthening data protection.
- Developed and maintained automation scripts in Python, Groovy, and Shell, eliminating manual processes and saving over 8 hours weekly in operational overhead.

- Automated configuration management and deployments using Ansible, improving efficiency across Environments.
- Spearheaded VPC peering resolution project, restoring network connectivity for 3 teams within SLA and earning leadership commendation.
- Orchestrated Route53 and Kubernetes Ingress integration, automating custom domain provisioning and streamlining service accessibility.
- Deployed Java-based applications on Apache Tomcat and NGINX, ensuring secure, high-availability setups for client-facing services.
- Partnered cross-functionally with QA and engineering teams to optimize CI test execution, reducing pipeline runtime by 15% and increasing release frequency.

CGI, Hyderabad – Associate Software Engineer

April 2022 – MARCH 2024

- Managed AWS infrastructure including VPCs, EC2, S3, Route53, IAM, and CloudWatch, ensuring high availability and security compliance.
- Implemented Argo CD GitOps workflows for Kubernetes (EKS) deployments, achieving zero-downtime releases and improving deployment synchronization across environments.
- Built reusable Terraform templates for EC2 provisioning and VPC networking, reducing environment setup time from days to hours.
- Optimized CI/CD pipelines using GitHub Actions and Maven, cutting build and deployment times by 20% and improving delivery reliability.
- Configured and maintained SonarQube integration in CI pipelines, enforcing code quality and security standards.
- Implemented S3 lifecycle policies and right sizing strategies, resulting in 20% cloud cost savings.
- Set up CloudWatch alarms and dashboards to proactively monitor EC2 and EKS resource utilization, ensuring early detection of performance bottlenecks.
- Managed Route53 DNS configurations and custom domain integrations for multi-region deployments.
- Assisted in designing VPC peering and VPN setups to enable secure inter-VPC communication across projects.
- Performed incident response and Level-1 troubleshooting, maintaining SLA compliance for production support.
- Supported automation of configuration management using Ansible, ensuring consistency and version control of server configurations.
- Collaborated in Agile teams, participated in sprint planning, and implemented DevOps feedback loops to improve deployment readiness.
- Mentored interns on CI/CD setup and container fundamentals, contributing to smoother on boarding and team capability growth and Maven, ensuring faster and more reliable software delivery.
- Applied in depth understanding of HTTP, TCP, and UDP protocols to troubleshoot latency, connectivity.

EDUCATION

Bachelor of Technology (B.Tech)

Kakatiya Institute of Technology and Sciences - Warangal, 2020

7.93 CGPA

HIGHLIGHTS

- Awarded Bronze at CGI for automating deployments and optimizing infrastructure, achieving 20% cost savings by right-sizing resources and improving microservices efficiency across environments.
- Recognized for cross-team collaboration and proactive incident management.
